

## CENTRAL ISLAND BRANCH MEMBERS

### TOOL LOANER PROGRAM

**Contents:** How the program operates – Page 1  
Loan Agreement – Page 2  
Tool Catalog – Pages 3-10

Welcome to the newly launched CIB (members only) Tool loaner Program. The Central Island Branch is excited to offer members a **FREE** Tool Loaner program!

Perhaps you have a job you'd like to complete but can't justify buying the tool for a one time job please check out our catalog and simply make a request. It's really simple!

1. Identify the tool you would like to borrow in the catalog
2. Contact Roger Tarry (Tool Crib Custodian) at 250-591-3124 or [tarmarog2006@gmail.com](mailto:tarmarog2006@gmail.com)
3. You can sign out the tool for up to 2 weeks but if you need it for longer you can request an extension as long as there is no one else waiting for the tool.
4. The tools are stored at Roger's house in Nanaimo (close to Departure Bay Ferry Terminal) and Roger can give you the address when you are booking the tool. Please note: tools must be picked up as we do not ship items.
5. There is no cost to borrow but we do ask for a deposit (equivalent to the replacement cost of the tool as estimated in the tool catalog) and will verify that you are a CIB member. If you give your credit card as a deposit, we will not process anything unless the tool does not get returned on time or is damaged to such an extent that we will need to replace the tool.
6. Once the tool is returned on time and in good usable condition, we will tear off the portion of the loaner agreement with your card number on it and return it to you for disposal as we do not keep any card numbers on file.

This is a new program and therefore, we may make some tweaks along the way but we really hope that the members find this to be a very valuable and useful perk to being a member of our awesome branch.

At this time we have a very good assortment of tools but if there is something you'd like to see offered, please let us know. If the program goes well we may be open to suggestions to add to the crib and would be happy to have your feedback.

Feel free to contact:

**CIB TOOL LOANER PROGRAM**  
**LOAN AGREEMENT**

I, \_\_\_\_\_ (OECC member) agree to borrow \_\_\_\_\_  
(tool SKU or Serial #) for an agreed to period of \_\_\_\_\_ day(s). **\* 14 days max. / sign out\***

By signing this agreement, I agree to return it promptly and in like condition as to when it was borrowed. I also agree to provide my credit card details as a deposit for the full replacement value as insurance that the borrowed item is:

- a) returned in a timely manner as agreed upon as per the sign out sheet
- b) returned in good, clean, usable condition (reasonable wear and tear to be expected)

I understand that no charges will be applied to my credit card unless:

- a) the item is not returned on time
- b) and/or the item is returned in an unusable/damaged condition

In this case, I agree to allow The **Old English Car Club (OECC)** to charge my credit card the **actual replacement value** (the amount listed in the Catalog is only an estimate) in order to replace the item & I acknowledge that I will no longer be required to return the borrowed item.

I also acknowledge that I am wholly responsible for the borrowed item during the time it is signed out to me and in my care and control. **I understand and accept that the OECC and/or its members do not assume any liability and understand that it is my sole responsibility to confirm the safe condition and operation of any item borrowed before putting it into use.** [     ]

In the event that I need to borrow the item for longer, I agree to contact the OECC to ask permission for an extension **before** the item return due date to confirm that it has not been promised to anyone else.

Name: \_\_\_\_\_ (Please print clearly)

Signature: \_\_\_\_\_ Date: \_\_\_\_\_ (MM/DD/YY)

Phone 1: \_\_\_\_\_ Phone 2: \_\_\_\_\_

.....**Cut here and destroy card information when item is returned**.....

Credit Card # \_\_\_\_\_ Exp. \_\_\_\_\_ CSV# \_\_\_\_\_

*\*Note: Credit card information will be destroyed after item has been returned and is not retained in any form\**

# OECC – CIB Tool Crib Catalog

## 1) Rebar-TechTorque Wrench

Part # 1/2-inch drive

- Half inch drive head, 40~300 foot-pound, 72-tooth ratchet head. Click preset style, automatic torque lock, industrial precision, dual direction, dual scale. Pre-calibrated to +/- 3% accuracy with traceable serial number.
- For nuts and bolts of cars, trucks, motorcycles, etc. Both for left-hand and right-hand thread.
- Body length of 20 inches, weighs 3 pounds. Made of hardened and heat-treated chrome vanadium steel, chrome plating finish.
- Automatic torque lock — pull down red knob to rotate shaft holding the knob until torque setting completed. The red knob snaps back and locks the torque after released. During use, wrench emits a click that can be heard and felt when the preset value is reached.
- Includes torque wrench, black protective case, accuracy calibration certificate and instruction manual.

***Approximate replacement value = \$70***

## 2) OTC Compression Tester

Part # 5605

- Complete with standard and specialty adapters this deluxe kit offers a complete package for compression testing on gasoline engines
- Kit includes the deep well connector used on recessed plug well style heads and the new Ford Triton engine adapter using 16 mm thread plugs
- Corrosion resistant nickel plated finish
- Extra long 25" flex hose gauge assembly with quick coupler allows easy viewing out of cluttered engine compartment
- Rugged blow molded hard case with removable lid

***Approximate replacement value = \$140***

### 3) OTC Brake Flaring Tool

Part # 6502

- Covers single, double and bubble type flares
- Single flare standard lines 3/16 inch - 5/8 inch and single flare metric lines 4 millimeters - 14 millimeters
- Double flare standard lines 3/16 inch - 1/2 inch and double flare metric lines 4 millimeters - 10 millimeters
- Bubble flare standard lines 3/16 inch - 1/2 inch and bubble flare metric lines 4.75 millimeters - 10 millimeters
- Kit contains flaring bar, arbor press, adapters, tube cutter, and debarring tool - all in a hard case

***Approximate replacement value = \$135***

### 4) XiTuanYuan Brake Bleed Kit

Part # XTY-00047

- Easy to use and carry: individuals can independently suck out waste oil and air and inject new oil. High quality box is used for storage and transportation, saving space and improving speed.
- Multifunctional use: the reading of vacuum gauge is clear and accurate. Multi specification adapters are suitable for most models. Non slip rubber handle provides comfort.
- Function: pressure.(0-30 inch Hg/0-760 mm Hg).
- Kit 2 in 1: includes hand pump with vacuum gauge, reservoir with 2 caps, 4 suction pipes, 8 adapters and a box.
- Note: Please select the correct parts before use and ensure the correct connection.

***Approximate replacement value = \$30***

### 5) Innova Timing Light

Part # 3568

- Top-of-the line timing light for the selective do-it-yourselfer
- Split-screen digital LCD readout displays Tachometer and Advance functions simultaneously
- Slim, rotating barrel for better aim at timing mark
- Works with most ignition systems: conventional, electronic and computer controlled systems - domestic and import
- Patented Skip Circuitry Test up to 9,990 RPM

***Approximate replacement value = \$130***

## 6) Muzerdo Tap and Die Set

Part # LS015-M

- This tap and die set are made of made of high carbon chromium bearing steel which are more stronger, An overall chromium coating improves the corrosion resistance of the generally used through-hardening bearing steel.
- 86 piece tungsten steel set comes in an organized, rugged plastic storage case
- Ideal for rethreading fasteners and fastener holes for auto and machinery repair. Perfect set for the professional craftsman
- Tap and die set is designed for thread cutting: tap is used to process internal thread, while the die is for external thread
- Known for their ability to start easily, these taps and dies are the most commonly used style and are perfect for most hand threading applications

***Approximate replacement value = \$170***

## 7) Dayuan Spring Compressor

Part # YT-98044

- This item is designed to compress many MacPherson Strut Spring sizes
- The broad spring contact and built in detent pins help to lock the spring into place for safer
- This Tools Strut Spring Compressor quickly and safely compresses the spring easily
- Replacement of the strut cartridge or strut assembly repair.
- The hooks are forged and the center screw is hardened for long life.

***Approximate replacement value = \$40***

## 8) Newbuy Slide Hammer Puller

Part # P20002

- Easily remove mechanical, press-fit parts (bearings, bushings, gears, pulleys, etc.) from a shaft; or remove shafts from inside a hole
- Full kit, ideal for use on a wide variety of pulling applications, including pulling dents; compatible with many sizes of bearings, gears and shafts.
- Constructed of sturdy carbon steel, our tool kit can withstand accidental drops or years of use without cracking or rust.
- We've included a detailed parts diagram and step-by-step instruction to make the piston wind-back process smooth

***Approximate replacement value = \$80***

## 9) Linkstyle Test Light Set (2)

Part # A250540-L001390009FBA

- **BIDIRECTIONAL VOLTAGE TESTING:** Easy to attach the alligator clamp either to negative or positive ground, there is a light-emitting diode on the circuit board for polarity indication (Red light indicates positive polarity"+" . Green light indicates negative polarity"-".)
- **EASY TO READ:** Our electric test pen has a large LCD digital display which is easy to read in both daylight and darkness because it has light.
- **DURABLE & FLEXIBLE:** Design with a stretchable long cable and probe which makes it easy to get into those hard-to-diagnose areas. Anti-bending design of the tail wire, no need to worry about bad contact of the line.
- **WIDE APPLICATION:** This circuit tester is ideal for checking various vehicles' electrical circuits, quickly checking automotive headlights, taillights, turn signal circuits, faulty sockets, and fuse connections, and also for testing other 6-24V DC wirings and circuits.

***Approximate replacement value = \$20 ea.***

## 10) 8milelake Fuel Pump and Vacuum Tester Carburetor Valve Pressure Tester

Part # SZ6521

- Test fuel pump output pressure to 10PSI
- Read engine vacuum to 28
- Comes with large 3-1/2" gauge
- Adapters suitable for most vehicles
- Package only contains one gauge.(Blow case for easy storage)

***Approximate replacement value = \$25***

## 11) SREMTCH Soldering Iron Kit

Part # 9160

- Advanced Heating & Cooling Technology – The inner-heated ceramic technology of the soldering gun make the soldering iron heat up quickly and save energy, it is also good for the temperature stable; The four ventilation holes on the soldering iron gun provide better heat dissipation, which can extend its lifespan
- Easy to use Digital Multimeter for measuring DC & AC voltage, DC & AC current, resistance, diode and continuity test. Measuring Instrument with function of data hold and large LCD
- Portable metal soldering iron support stand & cleaning sponge holds the soldering iron to ensure safety and convenience. It is safer than any other thin soldering stand.
- De-soldering pump & solder wick help cleaning – The de-soldering pump is made of high pressure vacuum tube and aluminum body frame, which allows one-handed use. It can absorb large amounts of solder while the solder wire is better for absorbing small amounts of solder
- Soldering iron tools are widely used for welding circuit board, appliance repair, home DIY hobbyists & jewelry welding. You can take it anywhere and you will find almost all tools match your soldering needs in the PU carry bag

***Approximate replacement value = \$40***

## 12) Moss Lift-A-Dot Punch

Part # 266-105

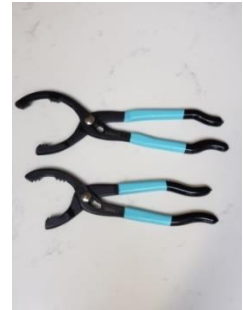

***Approximate replacement value = \$90***

## 13) Shall Oil Filter Wrench Set (2)

Part #

- What Including: 2-piece adjustable and heavy-duty metal oil filter wrenches (10" & 12") for pulling oil filters from cars, motorcycles and trucks or other general assembly tasks. Bonus: 2-pack PVC gloves (L size) for oil-proof purpose, avoiding your hands get dirty while pulling oil filters
  - Rust & corrosion resistant: Wrench head is made of high quality forged carbon steel and head's surface is processed with black powder coating finish. Built for long-term use, durable and anti-rusting
  - 3-position slip joint design: Adjustable with 3 positions. Flexible, three gears can be easily adjusted to clamp multiple diameters of oil filters in cars, motorcycles or trucks. Jaw capacity: 10 inch: 2-1/4" - 3-1/2" (58-88 mm); 12 inch: 2-1/2" - 4-9/16" (63.5-116 mm)
  - Strong holding: Featured with strong jaws and serrated teeth to clamp oil filter tightly and stably, even working for slippery and oil-covered surfaces. Anti-slip, able to remove and tighten oil filters easily with less effort and avoid slipping situation
  - 2-color PVC handle: Ergonomic design, providing non-slip and comfortable grip. Flexible and labor-saving, handle is long enough to reach long-distance and confined areas, more efficient leverage increases torque and reduces hand fatigue
- Approximate replacement value = \$20 ea.***

## 14) Battery Load Tester

***Donated by Julie McKay***

Part # BLT

\*may not be exactly as shown

***Approximate replacement value = \$40***

## 15) 2 Ton Engine Crane

***Donated by Doug Unia***

Part # EC

\*may not be exactly as shown

***Approximate replacement value = \$375***

## 16) Engine Crane Leveler

*Donated by Doug Unia*

Part # ECL

\*may not be exactly as shown

*Approximate replacement value = \$60*

## 17) Engine Stand

*Donated by Doug Unia*

Part # ES

\*may not be exactly as shown

*Approximate replacement value = \$250*

## 18) Jet Grease Gun

*Donated by Roger Tarry*

Part # GG

\*may not be exactly as shown

*Approximate replacement value = \$60*

## 19) Bullet Crimp Tool

*Donated by Roger Tarry*

Part # BCT

\*may not be exactly as shown

*Approximate replacement value = \$30*

## 20) Air Impact Gun

*Donated by Brian Collings*

Part # AIG

\*may not be exactly as shown

*Approximate replacement value = \$80*

## 21) 10" Random Orbit Polisher

*Donated by* \_\_\_\_\_  
Model# 8301

*Approximate replacement value = \$50*

## 22) PT Coolant System Pressure Tester

Part # W89733

- Performance Tool Brand
- 0-400 deg. F / PSI- 0-36
- Model Number: W89733

*Approximate replacement value = \$200*

## 23) Carburetor Synchronizer

*Donated by Doug Campbell*

Part # 386-200

- Balance air flow between multiple carburetors
- Approximate replacement value = \$50*

## 24) Clutch Alignment Tool

*Donated by David Rogers*

## 25) Mini Flywheel Puller

*Donated by David Rogers*

## 26) Mini Lifting Bar

*Donated by David Rogers*
